EDUCATION

Stony Brook University

B.S. Computer Science and Applied Mathematics, GPA: 3.7, Dean's List (4 semesters)

Stony Brook, NY

Expected May 2028

RELEVANT COURSEWORK

- Data Structures
- Discrete Mathematics
- Analysis of Algorithms
- Programming Languages
- Numerical Analysis
- Software Development
- Finite Structures
- Probability & Statistics

PROJECTS

Nutrition Scanner | *Next.js, TypeScript, PostgreSQL, Supabase, Vercel* Sep 2026 – Present

- Building a full-stack food logger with barcode lookup via Open Food Facts and daily nutrition totals
- Designing a PostgreSQL schema with row-level security so users can only access their own logs

PolyLens (YHack 2026) | *React, TypeScript, Express.js, WebSocket* | [Git Repo](#) Mar 2026

- Built a Polymarket trading analytics suite with P&L modeling, hedging, and portfolio tools at YHack 2026
- Streamed live market prices over WebSocket, with a 12-second polling fallback when the connection drops
- Built an Express API wrapping Polymarket's Gamma and CLOB APIs for markets, prices, and order books
- Modeled binary-market payoffs, combining crypto spot/perp positions with prediction-market hedges

Combat Toy | *C/C++, Arduino* | [Git Repo](#) | [Demo](#) Aug 2024 – Dec 2024

- Developed embedded software in C/C++ on Arduino to enable autonomous robot decision-making
- Implemented real-time object detection fusing ultrasonic sensor data and PIXY Cam image recognition for autonomous navigation
- Programmed classification logic to distinguish “friend” vs. “enemy” objects, enabling adaptive behavior

EXPERIENCE

Calculus II Teaching Assistant Aug 2025 – Dec 2025

Stony Brook University

Stony Brook, NY

- Supported 150 Calculus II students with step-by-step explanations of integration and infinite series
- Held regular office hours to clarify difficult material and guide students through multi-step problems
- Graded homework and exams for 150 students, giving feedback that helped them find and fix mistakes

Food Stall Manager Jun 2025 – Apr 2026

Japanfes

New York, NY

- Led and trained a team of 3–4 staff at a high-traffic food stall, coordinating roles during peak-hour service
- Handled up to \$10,000 in daily transactions and reconciled sales at close, maintaining accuracy
- Managed inventory and supply orders to prevent stockouts during multi-day festival events

Work Crew May 2025 – May 2026

Stony Brook University Campus Residences

Stony Brook, NY

- Completed 50+ resident work orders monthly, including repairs, appliance fixes, and room adjustments
- Contributed to housing renovations and facility upgrades across campus residences

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, Java, C, C++, SQL, R, OCaml, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, React Query, Recharts, NumPy, Matplotlib

Databases: PostgreSQL, Supabase

Developer Tools: Git, GitHub, Vercel, Vite, Arduino, IntelliJ, VS Code
